

Course Syllabus

Welcome to this two-day course, **Data Wrangling & Summarizing in R!**

Instructors: [Jessica Minnier, PhD \(https://nwnarch.instructure.com/courses/225/pages/meet-the-instructors\)](https://nwnarch.instructure.com/courses/225/pages/meet-the-instructors)

Date and time: June 18, 9:00am–12:00pm (Pacific) (Part 1)
June 19, 9:00am–12:00pm (Pacific) (Part 2)

Location: Morrison Meeting Room at the Residence Inn Portland Downtown/RiverPlace (2115 S River Pkwy, Portland, OR 97201)

Important notes:

- You will need to have access to R and RStudio before this course. Please use these [instructions to install both of these software](https://ohsu-octri-berd.github.io/R_RStudio_Installation/) [↗ \(https://ohsu-octri-berd.github.io/R_RStudio_Installation/\)](https://ohsu-octri-berd.github.io/R_RStudio_Installation/) on your laptop sometime before class begins on Wednesday. There will be an in-person help session immediately before class, 8:30-9am in the classroom on Thursday.
- If you unable to install software on your computer before the class begins, please [sign up for a free posit cloud account](https://posit.cloud/plans/free) [↗ \(https://posit.cloud/plans/free\)](https://posit.cloud/plans/free) and you will be able to run R on the web during the workshop.

About this course:

In this two-day course, we will introduce the freely available statistical software programs R and RStudio to trainees with no prior experience. We will cover how to use RStudio to write and run code, introduce data structure types, and demonstrate commands for working with data: loading, viewing, summarizing, plotting, cleaning, and saving. You will learn basic R data wrangling and plotting principles, and how to use them to create high-quality reproducible documents to present your work.

Learning objectives:

- Learn the fundamentals of how to use R and RStudio
- Load data
- Summarize data
- Visualize data
- Clean and manipulate data ready for analyses
- Export data and summary tables
- Create reproducible documents to present your work
